

Want the Best TPMS Relearn Chart On the Market? This Is It!

WORKING FOR THE INDUSTRY...WORKING FOR YOU.

Forget the competitor's TPMS relearn information. The **TIA Tire Pressure Monitoring System (TPMS) Relearn Chart** serves as a valuable, comprehensive, and quick reference guide that technicians can easily navigate through to service any vehicle – Foreign **AND** Domestic – equipped with TPMS.

Your organization won't want to be without one! It will save you time and money the first time you use it.

The **TIA Tire Pressure Monitoring System (TPMS) Relearn Chart** is divided

into two sections: domestic and imported vehicles. In each section, vehicles are listed by make, model, and year.

The **TIA TPMS Relearn Chart** includes:

- The type of TPMS, whether direct or indirect.
- Three columns of data that indicate when a system relearn is necessary, i.e. after a change in air pressure, tire rotation, or tire/sensor replacement.
- A relearn summary – this includes a reference number that corresponds to the vehicle's procedure for initiating sensor relearn mode. The vehicle relearns are located in the back of the corresponding section, either domestic or import.
- The sensor manufacturer.
- OEM sensor part number, Schrader replacement sensor part number, Schrader service pack number, Dill replacement sensor part number, Dill kit and band number, Continental replacement sensor part number, and Continental kit and band number.
- The torque specifications for the sensor nut, torx bolt, worm gear, and lug nuts are listed.
